

Environmental Policy

This UGI Corporation Environmental Policy (the “Environmental Policy”) applies to UGI Corporation and its subsidiaries (collectively, “UGI” or the “Company”) and is designed to address UGI’s environmental responsibilities. The objectives of this Environmental Policy are aligned with the Company’s Environmental, Social and Corporate Governance (“ESG”) Program and Code of Business Conduct and Ethics and establishes a basis for our commitment to the environment. Management shall report to the Safety, Environmental and Regulatory Compliance Committee of the Company’s Board of Directors, which oversees the Company’s environmental initiatives as part of its overall ESG program, with respect to the matters set forth below.

One of UGI’s key driving values is responsibility and this includes our relationship with the environment. UGI is committed to environmental responsibility and continues to challenge itself to deliver and use energy sustainably and to pursue innovative solutions that benefit our customers and our shared resource: the environment. Specifically, UGI seeks to manage the risks to the environment associated with greenhouse gas emissions and energy use.

UGI is committed to:

- Complying fully with the letter and spirit of environmental laws and regulations throughout our operations.
- Continuing to reduce the environmental impact of our own operations by delivering clean energy, maintaining energy-efficient operations including investing in alternatives, and transitioning away from heavier carbons like diesel used as a vehicle fuel
- Establishing and maintaining an environmental management system across all of our businesses to provide meaningful and reliable data for both internal and external reporting, promote environmental excellence and innovation, and train employees on applicable environmental requirements and goals.
- Engaging with our customers to promote more energy-efficient solutions.
- Engaging with our stakeholders as we strive to promote greater environmental efficiency throughout our operations.
- Investing in innovative energy technology.
- Providing meaningful data to our stakeholders and clearly communicating our progress and performance.
